T.J.S. ENGINEERING COLLEGE

(An Autonomous Institution)

REGULATIONS 2026

CHOICE BASED CREDIT SYSTEM (CBCS)

B.Tech. ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

Vision

To strive for Global Recognition through Research, Innovation and Excellence in imparting Quality Education to provide face lift to the students as solution providers to the modern society.

Mission

To imbibe the skills of simulating human intelligence in the students and to equip them with interdisciplinary skills using modern pedagogy.

To build digital learning content in the realm of AI&DS under pinning the theories of cognitive science

To help learners to develop competency in algorithmic approaches in resolving complexities of real time problems.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

1. Effectuating success in careers by exploring with the design, digital and computational analysis of engineering systems, experimentation and testing, smart manufacturing, technical services, and research.

2. Amalgamating effectively with stakeholders to update and improve their core competencies and abilities to ethically compete in the ever-changing multicultural global enterprise.

3. To encourage multi-disciplinary research and development to foster advanced technology, and to nurture innovation and entrepreneurship in order to compete successfully in the global economy.

4.To globally share and apply technical knowledge to create new opportunities that proactively advances our society through team efforts and to solve various challenging technical, environmental and societal problems.

5. To create world class mechanical engineers capable of practice engineering ethically with a solid vision to become great leaders in academia, industries and society.

Program Outcomes

1. Engineering Knowledge: Apply math, science, and engineering fundamentals to complex problems.

2. Problem Analysis: Identify and analyze complex problems using research and sustainability principles.

3. Design Solutions: Design systems and processes considering health, safety, cost, culture, and environment.

4. Investigations: Use experiments, modelling, and data analysis to reach valid conclusions.

5. Engineering Tools: Apply modern tools for modelling and problem-solving, recognizing their limits.

6. Society & Environment: Assess societal, legal, and environmental impacts of engineering solutions.

7. Ethics: Commit to ethics, human values, diversity, and legal compliance.

8. Teamwork: Work effectively as an individual and in multidisciplinary teams.

9. Communication: Communicate clearly in reports, presentations, and documentation across diverse groups.

10. Management & Finance: Apply management and economic principles in projects and teamwork.

11. Lifelong Learning: Engage in continuous learning, adapt to new technologies, and think critically.

Program Specific Outcomes

PSO1. Graduates would be able to evolve Artificial Intelligence based efficient domain specific process for effective and purposeful decision making in various domains including business and governments.

PSO2. Graduates should be able to solve business and engineering problems with foresight and insight from available data within the resources.

PSO3. The application of theoretical knowledge of Artificial Intelligence and data analysis packed with industrial tools and techniques should be able to help the graduates to solve the day-to-day problems emerging out of the social evils.
