B.E. ELECTRONICS AND COMMUNICATION ENGINEERING

Vision

Envision the upliftment of students with technological distinction and fulfill the needs of the industry and society with professional and moral values.

Mission

1. To bring technical competency and to provide quality education to the students in the field of Electronics and Communication Engineering.
2. Developing the state-of-the-art infrastructure for effective teaching and learning process.
3. Creating awareness and thirst for lifelong learning through interaction with outside world regarding technological trends and entrepreneurship with ethical values.
4. Nurture and retain faculty and technical man power.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

1. Effectuating success in careers by exploring with the design, digital and computational analysis of engineering systems, experimentation and testing, smart manufacturing, technical services, and research.

2. Amalgamating effectively with stakeholders to update and improve their core competencies and abilities to ethically compete in the ever-changing multicultural global enterprise.

3. To encourage multi-disciplinary research and development to foster advanced technology, and to nurture innovation and entrepreneurship in order to compete successfully in the global economy.

4. To globally share and apply technical knowledge to create new opportunities that proactively advances our society through team efforts and to solve various challenging technical, environmental and societal problems.

5. To create world class mechanical engineers capable of practice engineering ethically with a solid vision to become great leaders in academia, industries and society.

Program Outcomes

1. Engineering Knowledge: Apply math, science, and engineering fundamentals to complex problems.

2. Problem Analysis: Identify and analyze complex problems using research and sustainability principles.

3. Design Solutions: Design systems and processes considering health, safety, cost, culture, and environment.

4. Investigations: Use experiments, modelling, and data analysis to reach valid conclusions.

5. Engineering Tools: Apply modern tools for modelling and problem-solving, recognizing their limits.

6. Society & Environment: Assess societal, legal, and environmental impacts of engineering solutions.

7. Ethics: Commit to ethics, human values, diversity, and legal compliance.

8. Teamwork: Work effectively as an individual and in multidisciplinary teams.

9. Communication: Communicate clearly in reports, presentations, and documentation across diverse groups.

10. Management & Finance: Apply management and economic principles in projects and teamwork.

11. Lifelong Learning: Engage in continuous learning, adapt to new technologies, and think critically.

Program Specific Outcomes

PSO1. To analyze, design and develop solutions by applying foundational concepts of electronics and communication engineering.

PSO2. To apply design principles and best practices for developing quality products for scientific and business applications.

PSO3. To adapt to emerging information and communication technologies (ICT) to innovate ideas and solutions to existing/novel problems.
