B.Tech. INFORMATION TECHNOLOGY

Vision

To achieve global recognition through research, innovation, and excellence in quality education, empowering Information Technology students to become competent professionals and solution providers for modern societal and technological challenges.

Mission

- To provide quality education that builds strong technical and analytical skills in students.
- To encourage innovation, creativity, and continuous learning for solving real world IT challenges
- To shape students into responsible, ethical, and globally competent IT Professionals.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

1. Effectuating success in careers by exploring with the design, digital and computational analysis of engineering systems, experimentation and testing, smart manufacturing, technical services, and research.

2. Amalgamating effectively with stakeholders to update and improve their core competencies and abilities to ethically compete in the ever-changing multicultural global enterprise.

3. To encourage multi-disciplinary research and development to foster advanced technology, and to nurture innovation and entrepreneurship in order to compete successfully in the global economy.

4.To globally share and apply technical knowledge to create new opportunities that proactively advances our society through team efforts and to solve various challenging technical, environmental and societal problems.

5. To create world class mechanical engineers capable of practice engineering ethically with a solid vision to become great leaders in academia, industries and society.

Program Outcomes

1. Engineering Knowledge: Apply math, science, and engineering fundamentals to complex problems.

2. Problem Analysis: Identify and analyze complex problems using research and sustainability principles.

3. Design Solutions: Design systems and processes considering health, safety, cost, culture, and environment.

4. Investigations: Use experiments, modelling, and data analysis to reach valid conclusions.

5. Engineering Tools: Apply modern tools for modelling and problem-solving, recognizing their limits.

6. Society & Environment: Assess societal, legal, and environmental impacts of engineering solutions.

7. Ethics: Commit to ethics, human values, diversity, and legal compliance.

8. Teamwork: Work effectively as an individual and in multidisciplinary teams.

9. Communication: Communicate clearly in reports, presentations, and documentation across diverse groups.

10. Management & Finance: Apply management and economic principles in projects and teamwork.

11. Lifelong Learning: Engage in continuous learning, adapt to new technologies, and think critically.

Program Specific Outcomes

PSO1. To ensure graduates have proficiency in programming skills to design, develop and apply appropriate techniques, to solve complex engineering problems.

PSO2. Have knowledge to build, automate and manage business solutions using cutting edge technologies.

PSO3. Have excitement towards research in applied computer technologies.
